EXECUTIVE SUMMARY

Senior Data Engineer with 11+ years of experience designing and delivering enterprise-scale cloud data platforms across Supply Chain, Banking, Pharmaceutical and Financial Services domains. Expertise spans GCP, BigQuery, dbt, Airflow, Spark, Python, SQL, AWS, Snowflake and Palantir Foundry. Proven track record of architecting modern data platforms, reusable transformation frameworks, governed data products and production-grade orchestration.

Experienced in platform architecture, conceptual/logical/physical data modelling, production support, cloud optimization, engineering governance and technical leadership. Strong focus on building scalable, reliable and business-aligned data ecosystems that support planning, manufacturing analytics and executive decision-making.

Currently expanding into Generative AI and enterprise AI engineering while continuing to lead enterprise data platform modernization initiatives.

ENTERPRISE HIGHLIGHTS

- 11+ years of enterprise data engineering experience.
- Architected and modernized Supply Chain platform supporting 15 manufacturing plants and 200+ business users.
- Managed 50+ enterprise datasets, 200+ dbt models and 10+ production Airflow DAGs processing ~500 GB/day.
- Reduced BigQuery runtime by 50%, cloud cost by 20%, production failures by 35%, manual effort by 30%, and improved SLA adherence by 40%.
- Designed reusable dbt framework with macros, packages, testing, deployment standards and engineering governance.
- Led architecture reviews, mentoring, production support and platform modernization.

PROFESSIONAL EXPERIENCE

GENERAL MILLS — Senior Data Engineer (Mar 2023 – Present)

Enterprise Supply Chain Planning & Decision Intelligence Platform

Lead architecture and delivery of cloud-native data products supporting S&OE, Supply Chain Control Center, Planning Platform and Floodlight manufacturing analytics. Designed orchestration across SAP, Oracle, Historian, SightMachine, Kafka, Cloud Storage, BigQuery, dbt, Airflow and Palantir Foundry.

Key Responsibilities

- Architect enterprise-scale planning platform and reusable analytics engineering framework.
- Develop and govern 200+ dbt models using reusable macros, packages, selectors and deployment standards.
- Design conceptual, logical and physical data models.
- Lead production support, refresh sequencing, incident management and platform

stabilization.

- Partner with Planning, Manufacturing, Finance, Procurement, Sales and Platform Engineering teams.
- Conduct architecture reviews, code reviews, mentoring and sprint planning.

Key Achievements

- Reduced runtime by 50%.
- Reduced cloud cost by 20%.
- Reduced production failures by 35%.
- Reduced manual effort by 30%.
- Improved SLA adherence by 40%.
- Optimized large analytical queries (up to 66 GB) and improved BigQuery-Foundry refresh reliability.

ZS ASSOCIATES — Associate Consultant (Nov 2021 – Mar 2023)

Built analytics engineering platforms using dbt, Spark, Informatica IICS and Talend. Developed reusable dimensional models and SCD pipelines, improved load performance by ~40%, designed enterprise ingestion frameworks and collaborated with architects on pharmaceutical analytics platforms.

YES BANK — Technical Manager (Jul 2018 – Jul 2021)

Led integration of 50+ banking systems into an enterprise Spark Data Lake. Designed scalable ETL architecture across Oracle, Hive, Impala, Snowflake and SQL Server, established metadata governance and supported regulatory reporting.

MINDCRAFT SOFTWARE — Associate (Nov 2014 – Jun 2018)

Designed enterprise data warehouse solutions using Oracle and SQL Server, built PL/SQL ETL pipelines, dimensional/3NF models and contributed to Hadoop lineage initiatives.

TECHNICAL LEADERSHIP

Architecture Reviews • Technical Leadership • Engineering Standards • Production Support • Code Reviews • Mentoring • Platform Modernization • Cost Optimization • Cross-functional Collaboration

TECHNICAL SKILLS

Languages: Python, SQL, PySpark, HiveQL, PL/SQL, Shell

Cloud: GCP, AWS, BigQuery, Cloud Storage, Dataflow, Composer

Data Engineering: dbt, Spark, Airflow, Kafka, ETL/ELT, Data Products

Architecture: Data Modeling, Governance, Metadata, Lineage, Lakehouse

Platforms: Palantir Foundry, Snowflake, Hadoop

AI: Generative AI, Prompt Engineering, Workflow Automation

CERTIFICATION

Google Generative AI Leader (In Progress)

EDUCATION

Bachelor of Engineering (Computer Science), Visvesvaraya Technological University (VTU), 2010–2014
